

XT-DVI-HD SDI Digital to DVI-HD Converter

The DVI-HD is a miniature HD-SDI/SDI to DVI-D converter for LCD or Plasma monitors. Using a very high quality scaling engine, the HDP will automatically size 4:3 or 16:9 inputs to virtually any DVI-D monitor. For appropriate monitor configurations, scaling is automatically 1 to 1- for example, displaying 1920x1080 video on a WUXGA (1920x1200) monitor. The DVI-HD will also automatically adapt the input frame rate for monitor compatibility. In addition, the DVI-HD provides 2 channel RCA style audio monitoring and 2 looping outputs of the SDI inputs. DVI-HD is the ideal solution for displaying SDI or HD-SDI on any LCD or Plasma DVI-D monitor.

Features

- ✓ Converts HD-SDI/SDI to DVI-D for LCD/Plasma monitors
- ✓ Automatically adapts to any LCD monitor up to 1920x1200
- ✓ High quality scaling engine for proper display of 4:3 or 16:9 content
- ✓ Scaling is 1 to 1 for appropriate monitor configurations
- ✓ 2 channel iRCA-Jacki audio output
- ✓ 2 HD-SDI/SDI looping outputs
- ✓ Flexible 5-18V power supply

- ✓ HD SDI to DVI
- ✓ 4:3 or 16:9
- ✓ LCD/Plasma Displays
- ✓ 1 to 1 Scaling

Specification

Inputs	SMPTE-259/292/296 SDI/HD-SDI
Inputs Formats	1080i, 1080p, 720p, 525i, 625i
Outputs	DVI-D, Audio (2 channel RCA-style outputs), 2 Looping SDI outputs of the SDI inputs
Maximum DVI resolution:	1920x1200 @ 60Hz
Power	+5-18VDC, 5 watts
Dimensions	5.8" x 2.4" x 1" (131 x 61 x 25mm)
